DETAILED ACTION

Response to Amendment

1. This Office action is in response to the amendment dated August 23, 2004. Claims 2, 3, 5, 7, and 9-12 have been amended. New claims 20-33 have been added. Claims 1-33 are pending.
2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
3. The rejection of claims 1-19 under 35 USC 112, second paragraph, set forth in the last Office action, paragraphs 3-5, is withdrawn due to the amendment.
4. The rejection of claims 1, 2, 18, and 19 as being unpatentable over Aoki et al. (US 6,573,650) set forth in the last Office action, paragraph 7, is withdrawn due to applicant's persuasive remarks.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
6. Claims 20-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 20 recites "at least one organic layer contains at least one compound consisting of carbon, fluorine, silicon, and hydrogen". This recitation is considered broader than the class

Art Unit: 1774

of compounds described in the specification. Claim 20 includes all compounds that consist of carbon, fluorine, silicon, and hydrogen; however, the specification limits the amount of hydrogen present in a compound of the invention to no more than two hydrogens per six carbon atoms in a compound (see specification page 4, lines 6-10). Accordingly, there are compounds set forth in the claims that are not described in the specification and claims 20-26 are deemed to contain new matter.

Allowable Subject Matter

7. Claims 1-19 and 27-33 are allowed. The prior art fails to teach or to render obvious a compound consisting essentially of silicon, carbon, and fluorine as defined by the specification or a compound consisting of silicon, carbon, and fluorine as part of an organic light emitting element.

Response to Arguments

8. Applicant's arguments with respect to claims 1-33 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
